

The  
Muskoka  
Watersheds ***REPORT CARD***

---

2007

Background Reports

---

*Muskoka*  
WATERSHED COUNCIL

## **ACKNOWLEDGEMENTS**

The Muskoka Watersheds Report Card is based on current science and local monitoring programs. It would be impossible to recognize all the technical experts who have willingly provided their input and assistance but we are grateful to all of them. Without their knowledge and expertise, it would not have been possible to complete this project.

In particular, we would like to acknowledge our provincial and federal partners. The staff of the Ministry of Natural Resources and the Ministry of the Environment were essential in providing data and guidance.

The Trillium Foundation, the Ministry of Natural Resources and the Department of Fisheries and Oceans provided the funding for the Muskoka Inventory Project, without which we could not have completed the land component of the Report Card.

It is through working together that we will all be able to protect the health of the watersheds that we all love and enjoy.
